

Changes in 1.4, May 14, 2020

General

- The option for password validation by e-mail is added for extra security.
- Passwords can now be revealed briefly to verify them visually before submitting.
- Mill7 Mobile is now supporting access for external users. Your clients can log on to your application and view their invoices.
- A few minor style changes have been made.

Financial

- The trial balance is added.

Events

- A new events screen is added to the Dashboard where all events of all persons and companies can be managed.
 - o View and edit existing events and event details.
 - o Create new events and event details.
 - o 8 different filters are supported.
 - o 4 different sorting options.

Solved issues

- The employees list in the Contact tab could contain unrelated persons. This has been solved.
- It was possible to enter a value in the Account Manager field, which led to errors. This has been solved.
- Suggestion forms in the Events tab sometimes did not work correctly. This has been solved.
- The prompt for the users filter in the Events tab on mobile devices has been fixed.
- Some Excel files of VAT, ICP and CoC declarations could not be opened. This has been solved.
- The date filters in time did not work correctly. This has been solved.

Changes in 1.3, December 23, 2019

Clients

- Selecting clients has been improved in a few ways.
- Events have been added.
 - o View and edit existing events and event details per client.
 - o Create new events and event details.
 - o 6 different filters are supported.
 - o 4 different sorting options.

Time

- Users can now edit time their own time entries at Clients > Time.
- A date filter has been added to the filter function at Clients > Time.
- Time per client can now be sorted in many ways.

Financial

- VAT, ICP and CoC declarations sent for clients by Mill7 can be viewed.

Changes in 1.2, October 15, 2019

Time

- Your chargeability can now be viewed on the Dashboard / Home screen. This replaces the "New client" information.
- The following filters are added to Clients > Time:
 - o Invoice status
 - o Article
 - o Case
 - o Activity

Clients

- It is now possible to view all clients in Mill7Mobile instead of your own clients. This can be done in Mill7 by someone with access to the supervisor menu.
- The Mill7 filters on clients in relation management are now also active in Mill7Mobile. These filter settings can also be changed from Mill7Mobile.
- The contact information of your clients employees can now be accessed, making it possible to easily call or E-mail someone.
- From relation management the contact information of persons and companies can also be accessed

Solved issues

- Add time: Calculating the amount did not always work properly, In some situations the time rate was treated as a per activity rate.

Changes in 1.1, April 25, 2019

General

- Online help added.
- The web application can now be stopped when all users are blocked in case of an update of Mill7.
- Web application no longer logs off after 15 minutes when used on a pc.

Time

- Add time: the total written time of the date is now displayed.
- The "Enter" key can now be used to confirm every field in "Add time"

Clients

- Relation management module is added:
 - o By clicking on a line all the tab pages and fields will be shown just like in Mill7.
 - o Users can specify which files they want to see and in which order.
 - o Linked documents can be viewed
 - o Notes can be viewed
- The service company and the status of the client is added.
- Switching between clients is improved.
